

IMPROVING SEARCH WITH SYNONYMS

The best search solutions know that there's more than one way to ask a question. This course provides a solid understanding of how synonyms can improve your user search experience. You will learn to implement single- and multi-word synonyms and how they affect score. It also covers the differences between applying synonyms at index time, query time, or both. After completing this module, you will be well prepared to implement synonyms in a systematic and sustainable way.

LESSONS

All lessons include a hands-on lab.
